ANTY SAINT

LUX

The image displays a close-up of a marble surface with a light beige or cream-colored base. It is characterized by intricate, organic patterns of golden-brown and tan veins. These veins vary in thickness and direction, creating a complex, natural-looking texture. The overall appearance is that of a high-quality, natural stone material.

REAL
MARBLE

The image shows a detailed, close-up view of a natural marble surface. The color palette is primarily earthy, consisting of various shades of beige, tan, and light brown. Interspersed throughout are delicate, branching veins of a slightly darker brown and some thin, wispy lines of a pale blue or grey. The texture appears organic and complex, with irregular patterns and subtle variations in tone that give it a sense of depth and natural beauty.
